Wildlife Checklist

Report sightings of birds on the Raytheon Portsmouth, Rhode Island grounds!

Help the REWHC team report species diversity and species variation from season to season and year to year.

Additional copies of this checklist may be downloaded directly from the REWHC website at:
<http://rewhc.org/surveys/birds.shtml>

Site Survey

The Raytheon Employee Wildlife Habitat Committee (REWHC) is in process of making the Raytheon site in Portsmouth, Rhode Island more friendly to wildlife. To support this effort, REWHC needs to understand the existing diversity at the site and any changes to this diversity either planned or otherwise over time as we attempt to manage the local wildlife.

For the purposes of survey, wildlife and habitat features have been categorized as:

- Birds
- Mammals
- Plants
- Insects
- Reptiles & Amphibians
- History & Geology

A checklist has been prepared for each of the categories as a method of recording site survey information. A site map is provided which divides the site into a number of micro-ecosystems called zones. It is important to be familiar with your location on the map to record the zone in which you have identified each surveyed item.

Technique

The best time to look for birds is from dawn to mid-morning, since most avian species are active during that time. Regardless of other equipment you choose to bring, binoculars and a field guide are essential.

When identifying birds, it is often helpful to determine the general type of bird it is, and then use your guide to narrow down the species. Familiarize yourself with the set-up of your field guide. This will allow you to quickly refer to the appropriate section when you see a bird. For example, most field guides have sections on waterfowl, birds of prey, woodpeckers, etc. See the Bird Info-File at the REWHC website for further information

1.0 General Information

For us to make accurate connections between the species and the rest of the natural world, we need to make sure that information collected for REWHC is standardized among observers. By taking a little extra time, you can help us

- better understand whether certain species prefer certain habitats
- detect the relationship between weather and what's going on with the species
- determine how time of day, duration of time spent observing, and other factors influence which species we see

For a given visit, it is recommended that one zone be surveyed to provide optimal focus. Please use one checklist per zone per visit.

1.1 Standard Information

1: Observation Date (mm/dd/

2: Observer E-Mail (Optional)

3: : AM PM
Start Time

4: :
Duration (hh:mm)

5: I Am Reporting Every Species I Saw:
 Yes No

6: The observer (or group) rates their ability to identify all species present as:
 Fair Good Excellent

7: Weather conditions for detecting birds in the zones visited was:
 Fair Good Excellent

8: Zone Visited: (Enter the zone you visited)

Common Birds In Our Area

American Black Duck.....-00	Brown Thrasher.....-17
